This book analyses the current state and potential of economic and financial integration in South Asia, which has emerged as one of the most dynamic regions of the world. It looks at how regional convergences and cooperation would reinforce ties amongst the diverse economies of South Asia in the changing global economic landscape. Drawing on empirical research, the book looks at the degree of

economic and financial integration in South Asia, which according to the World Bank includes the least integrated regions in the world, and explores the fundamental factors that drive integration amongst these countries. It offers important insights into the financial landscape of the region, as well as the dynamics of the interlinkages in the banking system, the stock markets, and the debt markets. The book examines the role of bilateral trade in augmenting regional economic ties, the opportunities for growth these will foster, and the major challenges and roadblocks for the leaders of the region. It also provides an overview of China's role in South Asia's financial integration and the interdependence of

This volume is designed as a textbook for an introductory course on wavelet analysis and time-frequency analysis aimed at graduate students or advanced undergraduates in science and engineering. It can also be used as a self-study or reference book by practicing researchers in signal analysis and related areas. Since the expected audience is not presumed to have a high level of mathematical background, much of the needed analytical machinery is developed from the beginning. The only prerequisites for the first eight chapters are matrix
