This conception of truth presents a means of drawing together the insights of Post-Positivists and Critical Realists. Adorno shows that anti-objectivism, not the concern with truth per se, is a source of abstraction. Thus, critical International Relations (IR) theorists have been right to address a critical epistemological problematic.

Drawing on the philosophy of Theodor Adorno, the book argues that IR 's critical tradition can be rejuvenated by combining its original politicisation of truth with a critical account of its ' objectivity '. The book will be a valuable resource for scholars and graduate students interested in the future of critical International Relations theory.
