Kuomintang (KMT) army under General Chiang Kai-Shek. His acupuncture style was thus spared from the synthesis of the 'New Medicine' engendered as a consequence of the 1958 dictum by P.R.C. Chairman Mao Ze-Dong to create a 'New Medicine', i.e. to

unify the 'best' parts of Western and Chinese medicine. Ergo, the Tung Style escaped the efforts to compel acupuncture to conform to the model espoused by the TCM herbalists who had been assigned to the task of inventing this 'New Medicine' - forcing the

proverbial 'square peg into a round hole'. As a system, Tung Style Acupuncture does not necessitate the use of the diagnostic methods or terminology adopted by contemporary, herbalist-driven, TCM acupuncture; this renders

the Tung Style Acupuncture well suited for use by non-TCM trained clinicians. Furthermore, the clinical results obtained using the Tung Style Acupuncture often far surpass those achieved through the use of TCM acupuncture, especially in the West. This is, in

part, because Western patients seldom conform to an exact mold of a single TCM pattern. W

purported potential
neurodevelopmental toxicity of
some anesthetic agents are also
included. Working as both an

This text provides a comprehensive review and expertise on various

into a more common approach to addressing interventional cancer pain medicine. After discussing interventional options that are commonly employed by physicians, the text investigates how surgeons may address some of the more severe pain

syndromes, and covers the most important interventional available for our patients, intrathecal drug delivery. Chapters also cover radiologic options in targeted neurolysis and ablative techniques, specifically for bone metastasis, rehabilitation to

swimming legend and bestselling author tells of facing the one challenge that no amount of training could prepare her for. A celebrated athlete who set swimming records around the world, Lynne Cox achieved astonishing feats of strength and

endurance. She was the first to swim the frigid waters of the Bering Strait, the Strait of Magellan, and the coast of Antarctica, and she was the fastest to swim the English Channel. But it is a different kind of struggle that pushes her to the

brink. In a short period of time, Lynne loses her father, and then her mother, and then Cody, her beloved Labrador retriever. Soon after, Lynne herself is diagnosed with a life-threatening heart condition that leaves her unable to swim and barely able to walk.

But against all odds, and with the support of her friends and family, Lynne begins the slow pull toward recovery, reaching always for the open waters that give her the freedom and mastery that mean everything to her. What follows is a beautifully poignant meditation

on loss and an exhilarating celebration of life as, to Lynne's surprise, she begins to find, within the unfamiliar space of vulnerability, the greatest treasures—like falling in love.
