The creators of Kali Linux developed the industry-leading web application security course Advanced Web Attacks and Exploitation (AWAE). AWAE is an online, self-paced course to learn how to secure web apps with primarily white box methods. Students will learn how to perform a deep analysis of decompiled code and exploit vulnerabilities by chaining them into complex attacks.

especially demanding, requiring a great deal of student-instructor interaction. For this reason, the AWE security training course is only available in a live hands-on environment at Black Hat USA in Las Vegas, NV.

Additionally, to get the most out of this live penetration testing course you will want to spend time in the evenings working through case studies and reviewing the provided reading material.

~~Advanced Web Attacks And Exploitation Pdf~~

The days of porous network perimeters are fading fast as externally facing services become more resilient and harder to exploit. In order to gain that critical initial foothold in a network, penetration testers must be fluent in the art of exploiting front-facing web applications. Offensive Security's Advanced Web Attacks and Exploitation (AWAE) Course was created by taking widely deployed web applications found in many enterprises and actively exploiting them.
