Paul Virilio is an innovative figure in the study of architecture, space, and the city. Virilio for Architects primes readers for their first encounter with his crucial texts on some of the vital theoretical debates of the twenty-first century, including: Oblique Architecture and Bunker Archeology Critical Space and the Overexposed City The Ultracity and Very High Buildings Grey Ecology and Global Hypermovement In exploring Virilio' s most important architectural ideas and their impact, John Armitage traces his engagement with other key architectural and scientific thinkers such as Claude Parent, Benoit B. Mandelbrot, and Bernard Tschumi. Virilio for Architects allows students, researchers, and non-academic readers to connect with Virilio' s distinctive architectural theories, critical studies, and fresh ideas.

This book presents the proceedings of the 18th International Conference on Graphic Design in Architecture, EGA 2020, focusing on heritage – including architectural and graphic heritage as well as the graphics of heritage. Consisting of two parts: " Representation and Analysis " and " Concept and Creation ", this second volume gathers selected contributions on topics ranging from graphic representation to the graphic presentation of ideas, i.e. artistic creation, to bridge the gap between graphic heritage and the graphics of heritage. Given its scope, this volume will appeal to architectural and graphic designers, artists and engineers, providing them with extensive information on new methods and a source of inspiration for future research and interdisciplinary collaborations.

This book examines a variety of subjective spatial experiences and knowledge production practices in order to shed new light on the specifics of contemporary socio-spatial change, driven as it is by inter alia, digitalization, transnationalization and migration. Considering the ways in which emerging spatial phenomena are conditioned by an increasing interconnectedness, this book asks how spaces are changing as a result of mediatization, increased mobility, globalization and social dislocation. With attention to questions surrounding the negotiation and (visual) communication of space, it explores the arrangements, spatialities and materialities that underpin the processes of spatial refiguration by which these changes come about. Bringing together the work of leading scholars from across diverse range disciplines to address questions of socio-spatial transformation, this volume will appeal to sociologists and geographers, as well as scholars and practitioners of urban planning and architecture.

Newly available in paperback, this book overturns existing understandings of the origins and futures of the War on Terror for the purposes of International Relations theory. It demonstrates why this is not a war in defence of the integrity of human life, but a war over the political constitution of life in which the limitations of liberal accounts of humanity are a fundamental cause of the conflict. The question of the future of humanity is posed by this war, but only in the sense that its resolution depends on our abilities to move beyond the limits of dominant understandings of the human and its politics. Theorising with and beyond the works of Foucault, Deleuze, Baudrillard, Virilio and Negri, this book examines the possibilities for such a movement. What forms does human life take, it asks, when liberal understandings of humanity are no longer understood as horizons to strive for, but impositions against which the human must struggle in order to fulfill its destiny? What forms does the human assume when war against liberal regimes becomes the determining condition of its possibility? Answers to such questions are pressing, this book argues, if we earnestly desire an escape from the current impasses of international politics.

The first dictionary dedicated to the work of Paul Virilio, offering you clear and contemporary direction through the work of Virilio, the French critic of art and technology.

Research informs the development of a project which, rather than defusing these characteristics, attempts to integrate them within the scene of a political struggle. The proposed project dramatizes, through its architecture, a Palestinian disobedience to the colonial legislation imposed on its legal territory. In fact, the State of Israel masters the elaboration of territorial and architectural colonial apparatuses that act directly on Palestinian daily lives. In this regard, it is crucial to observe that 63% of the West Bank is under total control of the Israeli Defense Forces in regards to security, movement, planning and construction. Weaponized Architecture is thus manifested as a Palestinian shelter, with an associated agricultural platform, which expresses its illegality through its architectural vocabulary.

A critic of the art of technology, Paul Virilio has taught us that much media image is a strategy of war and that accident is becoming indistinguishable from attack. In these times of fierce conflict over which kind of capitalism is to take over the shrinking globe, and indeed which modernities we will live in during the twenty-first century, Paul Virilio is a significant contemporary theorist. But Virilio's work, originally published in French and stretching back to the 1950s, has until now been very difficult to access in full in English transtation, available as it is in expensive little books or obscure catalogues and journals. The Paul Virilio Reader collects together for the first time readable extracts of Virilio's work from the entire range of his career. It is prefaced by an editorial introduction showing that Virilio has produced important - if controversial - 'theory at the speed of light' that can uncannily illuminate the impact of new information and communications technologies in a world which collapses time and distance as never before. Features* Extracts have been carefully selected to reflect the whole of Virilio's diverse career* A chronological ordering illustrates the development, and interconnectedness, of Virilio's work* Each extract is prefaced by a bibliographical and contextual commentary, and the book is completed by an innovative guide to reading Virilio.

Edited by one of the leading Virilio authority's, this book offers the reader a guide through Virilio's work. Using the interview form, Virilio speaks incisively and at length about a vast assortment of cultural and theoretical topics, including architecture and 'speed-space', 'chronopolitics', art and technoculture, modernism, postmodernism and 'hypermodernism', the time of the trajectory and the 'information bomb'. His thoughts on Foucault, Baudrillard, Deleuze and Guattari, the performance artist Stelarc, the Persian War and the Kosovo War, are also gathered together.
