Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, certain unifying concepts consolidate it into a single, coherent field.

~~Biology - Wikipedia~~

Biology definition is - a branch of knowledge that deals with living organisms and vital processes. How to use biology in a sentence.

~~Biology | Definition of Biology by Merriam-Webster~~

1. The science of life and of living organisms, including their structure, function, growth, origin, evolution, and distribution and encompassing numerous fields such as botany, zoology, mycology, and microbiology. 2. The life processes or characteristic phenomena of a group or category of living organisms: the biology of fungi.
