The definitive guide for anyone with a game idea who wants to know how to get it published from a Game Design Manager at Wizards of the Coast, the world's largest tabletop hobby game company. Do you have an idea for a board game, card game, role-playing game or tabletop game? Have you ever wondered how to get it published? For many years Brian Tinsman reviewed new game submissions for Hasbro, the largest game company in the US. With *The Game Inventor's Guidebook: How to Invent and Sell Board Games, Card Games, Role-playing Games & Everything in Between!* he presents the only book that lays out step-by-step advice, guidelines and instructions for getting a new game from idea to retail shelf.

Easy, do-able, down to earth ideas and suggestions for everyone to help save the planet. If you want to save the planet, but your to-do list is already pretty long and remembering your re-usable coffee cup feels like a Herculean task, then this is the book for you. Covering every aspect of our lives from the stuff we buy and the food we eat, to how we travel, work, and celebrate. This book provides stacks of practical, down to earth ideas to slot into your daily life, alongside a gentle kick up the butt to put your newfound knowledge into action. Practical tips include unsubscribing from all the tempting emails that drop into your inbox with details of the newest clothing range or the latest sale, and keeping a mug next to your kettle to work out how much water you actually need to boil each time, as over filling kettles costs British households £68 million on energy bills each year. Find out how to fit "sustainable living" into your life, in a way that works for you. Change your impact without radically changing your life and figure out the small steps you can make that will add up to make a big difference (halo not included).

The nonfiction debut from the author of the international bestseller *Sacred Games* about the surprising overlap between writing and computer coding Vikram Chandra has been a computer programmer for almost as long as he has been a novelist. In this extraordinary new book, his first work of nonfiction, he searches for the connections between the worlds of art and technology. Coders are obsessed with elegance and style, just as writers are, but do the words mean the same thing to both? Can we ascribe beauty to the craft of writing code? Exploring such varied topics as logic gates and literary modernism, the machismo of tech geeks, the omnipresence of an "Indian Mafia" in Silicon Valley, and the writings of the eleventh-century Kashmiri thinker Abhinavagupta, *Geek Sublime* is both an idiosyncratic history of coding and a fascinating meditation on the writer's art. Part literary essay, part technology story, and part memoir, it is an engrossing, original, and heady book of sweeping ideas.

Enzyme immunoassays have developed into a powerful assay technology, transcending several discipline boundaries, extensively applied as a tool in fields other than enzymology and immunology. The first swap was executed over thirty years ago. Since then, the interest rate swaps and other derivative markets have grown and diversified in phenomenal directions. Derivatives are used today by a myriad of institutional investors for the purposes of risk management, expressing a view on the market, and pursuing market opportunities that are otherwise unavailable using more traditional financial instruments. In this volume, Howard Corb explores the concepts behind interest rate swaps and the many derivatives that evolved from them. Corb's book uniquely marries academic rigor and real-world trading experience in a compelling, readable style. While it is filled with sophisticated formulas and analysis, the volume is geared toward a wide range of readers searching for an in-depth understanding of these markets. It serves as both a textbook for students and a must-have reference book for practitioners. Corb helps readers develop an intuitive feel for these products and their use in the market, providing a detailed introduction to more complicated trades and structures. Through examples of financial structuring, readers will come away with an understanding of how derivatives products are created and how they can be deconstructed and analyzed effectively.

A bribery case gone wrong leads a woman into the deep, dank Carolina Lowcountry on a manhunt. Carolina Slade, a by-the-book federal county manager in the coastal Lowcountry of South Carolina, reports an

attempted bribe only to find herself a key player in a sting operation run by Senior Special Agent Wayne Largo from the IG Office in Atlanta. However, the IG isn't telling Slade everything about this case or the disappearance-presumed-murder of Slade's boss the year before. When the sting blows up, both cases are put on hold and Wayne is yanked back to Atlanta, leaving Slade to fear not only for her life and job, but for her children's safety. Suddenly, operating by the book is no longer an option. Author C. Hope Clark, an award-winning writer of two mystery series (Carolina Slade and the Edisto Island mysteries), founded FundsforWriters.com, which Writer's Digest has recognized in its annual 101 Best Web Sites for Writers for almost two decades. Hope is married to a 30-year veteran of federal law enforcement, a Senior Special Agent, now a private investigator. They live in South Carolina, on the banks of Lake Murray. Hope is hard at work on the next novel in her Carolina Slade Mystery Series. Visit her at [www.chopeclark.com](http://www.chopeclark.com).
