More than any other advanced industrial democracy, the United States is besieged by firearms violence. Each year, some 30,000 people die by gunfire. Over the course of its history, the nation has witnessed the murders of beloved public figures; massacres in workplaces and schools; and epidemics of gun violence that terrorize neighborhoods and claim tens of thousands of lives. Commanding majorities of Americans voice support for stricter controls on firearms. Yet they have never mounted a true national movement for gun control. Why? Disarmed unravels this paradox. Based on historical archives, interviews, and original survey evidence, Kristin Goss suggests that the gun control campaign has been stymied by a combination of factors, including the inability to secure patronage resources, the difficulties in articulating a message that would resonate with supporters, and strategic decisions made in the name of effective policy. The power of the so-called gun lobby has played an important role in hobbling the gun-control campaign, but that is not the entire story. Instead of pursuing a strategy of incremental change on the local and state levels, gun control advocates have sought national policies. Some 40% of state gun control laws predate the 1970s, and the gun lobby has systematically weakened even these longstanding restrictions. A compelling and engagingly written look at one of America's most divisive political issues, Disarmed illuminates the organizational, historical, and policy-related factors that constrain mass mobilization, and brings into sharp relief the agonizing dilemmas faced by advocates of

gun control and other issues in the United States.

Draws on research in Kristin A. Goss, *Disarmed: The Missing Movement for Gun Control in America* (Princeton University Press, 2006), along with data on gun rampages recently compiled by Mother Jones magazine.

No topic is more polarizing than guns and gun control. From a gun culture that took root early in American history to the mass shootings that repeatedly bring the public discussion of gun control to a fever pitch, the topic has preoccupied citizens, public officials, and special interest groups for decades. *The Gun Debate: What Everyone Needs to Know*® delves into the issues that Americans debate when they talk about guns. With a balanced and broad-ranging approach, noted economist Philip J. Cook and political scientist Kristin A. Goss thoroughly cover the latest research, data, and developments on gun ownership, gun violence, the firearms industry, and the regulation of firearms. The authors also tackle sensitive issues such as the effectiveness of gun control, the connection between mental illness and violent crime, the question of whether more guns make us safer, and ways that video games and the media might contribute to gun violence. No discussion of guns in the U.S. would be complete without consideration of the history, culture, and politics that drive the passion behind the debate. Cook and Goss deftly explore the origins of the American gun culture and the makeup of both the gun rights and gun control movements. Written in question-and-answer format, the book will help readers make sense of the ideologically driven statistics and slogans that characterize our national conversation on firearms. This book is a must-read for anyone interested in getting a clear view of the issues surrounding guns and gun policy in America. *What Everyone Needs to Know*® is a registered trademark of Oxford University Press.

The new edition of this classic text covers the latest developments in American gun policy including the most recent shooting incidents that persist in plaguing the American landscape. Continuing a multi-decade trend, crime generally remains low throughout the US, but mass shootings have increased in both number and lethality, stoking greater support for gun laws among the public. Two seismic political events are highlighted in the eighth edition. The first is the ascendance of the gun safety movement, culminating in numerous electoral victories for gun law supporters in 2018 congressional and state races around the country. This outcome, which contributed to the Democrats' capture of the House of Representatives for the first time since 2008, also demonstrates that support for stronger gun laws could be a winning issue for proponents in 2020 and beyond. The second political development featured is the financial, political, and legal crises that beset the nation's oldest and most powerful gun group, the National Rifle Association. These crises are sufficiently grave that they may pose an existential threat to the organization's traditional dominance in the realm of gun politics. Author Robert J. Spitzer has long been a recognized authority on gun control and gun policy. His even-handed treatment of the issue--as both a member of the NRA and the Brady Center--continues to compel national and international interest, including appearances on major media such as the PBS NewsHour. The eighth edition of *The Politics of Gun Control* provides the reader with up-to-date data and coverage of gun ownership, gun deaths, school shootings, border patrols and new topics including universal background checks, limits on large capacity ammunition magazines, and "red flag" laws. New to the Eighth Edition Covers the ascendance of the Second Amendment sanctuary and gun safety movements, resulting from heinous shootings in Las Vegas and Parkland, Florida. Tracks the financial, political, and legal crises that threaten the dominance of the National Rifle Association. Examines new policy measures including universal background checks, limits on large capacity ammunition magazines, the bump stock controversy, and "red flag" laws, among others.

A comprehensive assessment of real gun reform legislation with recommendations for common sense gun control A month after the Sandy Hook Elementary School shooting, New York State passed, with record speed, the first and most comprehensive state post-Sandy Hook gun control law. In *The Toughest Gun Control Law in the Nation*, James B. Jacobs and Zoe Fuhr ask whether the 2013 SAFE Act --hailed by Governor Andrew Cuomo as "the nation's toughest gun control law" -- has lived up to its promise. Jacobs and Fuhr illuminate the gap between gun control on the books and gun control in action. They argue that, to be effective, gun controls must be capable of implementation and enforcement. This requires realistic design, administrative and enforcement capacity and commitment and ongoing political and fiscal support. They show that while the SAFE Act was good symbolic politics, most of its provisions were not effectively implemented or, if implemented, not enforced. Gun control in a society awash with guns poses an immense regulatory challenge. *The Toughest Gun Control Law in the Nation* takes a tough-minded look at the technological, administrative, fiscal and local political impediments to effectively keeping guns out of the hands of dangerous persons and eliminating some types of guns altogether.

Scholars studying the causes and consequences of political representation, particularly in terms of gender and race, often turn to a concept called descriptive representation. Descriptive representation tells us the degree to which elected officials resemble their constituents, and whether such a resemblance has a bearing on the way they legislate. In other words, do people vote for candidates of their same racial/ethnic background or gender? If they do, does this affect the type of policies an elected official pursues? Further, if citizens see people who look like them in office, does it have an effect on their political attitudes and participation? In this book, Christopher J. Clark argues that descriptive representation is a more multi-faceted phenomenon than previously shown, particularly when observed at the state level. He contends that black political involvement, political attitudes, and public opinion are contingent on more than being represented by a single black elected official. Rather, they hinge on the proportion of African Americans making up a state legislature--what Clark terms "black

Bookmark File PDF Disarmed The Missing Movement For Gun Control In America Princeton Studies In American Politics Historical International And Comparative Perspectives

seat share"--as well as the degree to which that proportion reflects the demographic makeup of the state. As well, Clark pinpoints the critical mass of African American legislators necessary to initiate the creation of black caucuses, an important institution for minority representation. Clark bases his study on an examination of black representation in state legislatures between 1966 and 2010, looking particularly at black political opinion and involvement in the development of welfare and education policy.

An in-depth analysis of the folklore surrounding gun use and the state of the debate in today's political climate.

Kristin A. Goss examines how women's civic place has changed over the span of more than 120 years, how public policy has driven these changes, and why these changes matter for women and American democracy. As measured by women's groups' appearances before the U.S. Congress, women's collective political engagement continued to grow between 1920 and 1960--when many conventional accounts claim it declined--and declined after 1980, when it might have been expected to grow. Goss asks what women have gained, and perhaps lost, through expanded incorporation, as well as whether single-sex organizations continue to matter in 21st-century America.

As cultural, social, political, and historical objects, guns are rich with complex and contested significance. What guns mean, why they matter, and what policies should be undertaken to regulate guns remain issues of vigorous scholarly and public debate. Gun Studies offers fresh research and original perspectives on the contentious issue of firearms in public life. Comprising global, interdisciplinary contributions, this insightful volume examines difficult and timely questions through the lens of: Social practice Marketing and commerce Critical theory Political conflict Public policy Criminology Questions explored include the evolution of American gun culture from recreation to self-protection; the changing dynamics of the pro-gun and pro-regulation movements; the deeply personal role of guns as sources of both injury and security; and the relationship between gun-wielding individuals, the state, and social order in the United States and abroad. In addition to introducing new research, Gun Studies presents reflections by senior scholars on what has been learned over the decades and how gun-related research has influenced public policy and everyday conversations. Offering provocative and often intimate perspectives on how guns influence individuals, social structures, and the state in both dramatic and nuanced ways, Gun Studies will appeal to students and researchers interested in fields such as sociology, political science, legal history, criminology, criminal justice, social policy, armaments industries, and violent crime. It will also appeal to policy makers and all others interested in and concerned about the use of guns.
