ENDOCRINE STUDY GUIDE CHART - NURSING.com

Endocrine System Overview Endocrinology is the study of endocrine cells/organs, the hormones secreted, regulation of hormone secretion and the effects of hormones on their target cells/organs. Endocrine vs. Exocrine tissues Endocrine secretes hormones, while exocrine secretes all the other stuff (mucus, enzymes, sweat).

Endocrine System Overview - Straight A Nursing

The ovaries: The endocrine system and reproductive system gland that produces progesterone, estrogen, inhibin and androstenedione
Progesterone: The ovarian hormone that is secreted by the ovaries and plays a role in the menstrual cycle and the preparation of the uterus for the implantation of the fertilized egg or ovum

Endocrine System: TEAS || RegisteredNursing.org

I love seeing that “lightbulb” moment when students realize that they’ve been making the endocrine system a lot harder than it needs to be. Which is why I was so surprised when I realized that I’ve never, ever explained the best way to study Endocrine diseases on this blog. After all, Endocrine is only about the scariest, most intimidating, and seemingly complicated Med-Surg topic that ...

How to Study Endocrine in Med-Surg – Your Nursing Tutor

There are eight major glands that help in the functioning of the endocrine system. These are the pituitary gland, hypothalamus, thyroid, parathyroid, adrenals, pineal body and the reproductive glands (testes and ovaries). The pituitary gland is integral to the whole system.

Your one minute guide to the endocrine system | Nursing Times

A great way to study Endocrine diseases is to start with two columns: one for hyper function and one for hypo function. On the side of your columns, write out each receptor gland (i.e. pancreas, thyroid, etc). Then start filling out your chart by listing the symptoms, treatment, and nursing care for each gland when it is hyper and hypo function.
