Effective knowing and learning for vocational purposes must take account of the wide range of variables that impact on knowledge formation and that promote learning. In light of those many variables, the formal sector of technical and vocational education and training (TVET) must constantly ask itself what it could and should do to better provide vocational learning for those people likely to pursue learning via the informal sector. This book addresses that question. Vocational Learning: Innovative Theory and Practice discusses four theoretical aspects of vocational learning that support understanding of vocational learning processes and practices: the situations of vocational learning; the power and roles of social networks and identity in vocational learning; knowing and knowledge management processes; and the implications for pedagogic practices in both informal and formal TVET systems. The book provides an overview of a series of international examples of innovative approaches to vocational educational theory and practice, and it draws on empirical research to analyze the effects of those approaches. It includes unique insights into aspects of TVET for Indigenous peoples. With a discussion of policy implications for Europe, North America and Australia, this book is an instrumental tool to understand the underlying factors that generate effective educational and workforce outcomes through effective formal and informal learning.

This unique and innovative Revision Book supports all learning styles so that every student can achieve the best results. Whether you are a visual, auditory or kinaesthetic learner, this revision guide supports the revision techniques that you are most su

Interrogates the rise of national philosophies and their impact on cosmopolitanism and nationalism.

Michel Foucault's death in 1984 coincided with the fading away of the hopes for social transformation that characterized the postwar period. In the decades following his death, neoliberalism has triumphed and attacks on social rights have become increasingly bold. If Foucault was not a direct witness of these years, his work on neoliberalism is nonetheless prescient: the question of liberalism occupies an important place in his last works. Since his death, Foucault's conceptual apparatus has acquired a central, even dominant position for a substantial segment of the world's intellectual left. However, as the contributions to this volume demonstrate, Foucault's attitude towards neoliberalism was at least equivocal. Far from leading an intellectual struggle against free market orthodoxy, Foucault seems in many ways to endorse it. How is one to understand his radical critique of the welfare state, understood as an instrument of biopower? Or his support for the pandering anti-Marxism of the so-called 'new philosophers'? Is it possible that Foucault was seduced by neoliberalism? This question is not merely of biographical interest: it forces us to confront more generally the mutations of the left since May 1968, the disillusionment of the years that followed and the profound transformations in the French intellectual field over the past thirty years. To understand the 1980s and the neoliberal triumph is to explore the most ambiguous corners of the intellectual left through one of its most important figures.
