Dialogue on global warming has progressed from the Kyoto Protocol to meetings in

Copenhagen and Cancun and will soon resume in meetings in South Africa. Some observers consider the Copenhagen conference a failure. EU representatives, in contrast, present an optimistic evaluation of achieving a global temperature rise limit of not more than 2 ° C by 2100. Geoscience researchers and lead investigators of the Intergovernmental Panel on Climate Change (IPCC) have supported CO₂ emission reduction pledges and contend that we can achieve the 2 ° C limit through international coordination. This position conflicts with evaluations of United States Congressional and Presidential advisors, who do not believe the Copenhagen CO₂ reduction commitments can hold the global warming increase to below 2 ° C and who have not supported the agreement. Developing countries are alarmed, because climate change is expected to hit them hardest. The developed world will use

energy to mitigate global warming effects, but developing countries are more exposed by geography and poverty to the most dangerous consequences of a global temperature rise. The Oxford Handbook of the Macroeconomics of Global Warming analyzes the macroeconomics of global warming, especially the economics of possible preventative measures, various policy changes, and potential effects of climate change on developing and developed nations.

At a time when diplomatic practices and the demands imposed on diplomats are changing quite radically, and many foreign ministries feel they are being left behind, there is a need to understand the various forces that are affecting the profession. Diplomacy remains a salient activity in today's world in which the basic authoritative actor is still the state. At the same time, in some respects the practice of diplomacy is undergoing significant, even radical, changes to the context, tools, actors and domain of the trade. These changes spring from the changing nature of the state, the changing nature of the world order, and the interplay between them. One way of

describing this is to say that we are seeing increased interaction between two forms of diplomacy, 'club diplomacy' and 'network diplomacy'. The former is based on a small number of players, a highly hierarchical structure, based largely on written communication and on low transparency; the latter is based on a much larger number of players (particularly of civil society), a flatter structure, a more significant oral component, and greater transparency. The Oxford Handbook of Modern Diplomacy is an authoritative reference tool for those studying and practicing modern diplomacy. It provides an up-to-date compendium of the latest developments in the field. Written by practitioners and scholars, the Handbook describes the elements of constancy and continuity and the changes that are affecting diplomacy. The Handbook goes further and gives insight to where the profession is headed in the future. Co-edited by three

Setting the agenda on agenda setting, this Handbook explores how and why private matters become public issues and occasionally government priorities. It provides a comprehensive overview and analysis of the perspectives, individuals, and institutions involved in setting the government ' s agenda at subnational, national, and international levels. Drawing on contributions from leading academics across the world, this Handbook is split into five distinct parts. Part one sets public policy agenda setting in its historical context, devoting chapters to more in-depth studies of the main individual scholars and their

works. Part two offers an extensive examination of the theoretical development, whilst part three provides a comprehensive look at the various institutional dimensions. Part four reviews the literature on sub-national, national and international governance levels. Finally, part five offers innovative coverage on agenda setting during crises.

The Bloomsbury Handbook of Religious Education in the Global South presents new comparative perspectives on Religious Education (RE) across the Global South. Including 23 chapters written by scholars from the Global North and South, this is the first authoritative reference work on the subject. The handbook is thematically organised into seven sections. The first three sections deal with provision, response to changes in contemporary society, and decolonizing RE. The next four sections

explore young people and RE, perspectives on teachers, RE in higher education, and finally, challenges and opportunities for RE. The term 'Global South' is used here primarily to signify the deep economic divide with the Global North, but the concept is also examined in historical, geographical, political, social and cultural terms, including the indelible influence of religion in all four broadly defined regions. Exploring RE from local, cross-national as well as regional and sub-regional perspectives, the handbook examines RE from its diverse past, present realities, and envisioned future revealing not only tensions, contestations, injustices and inequalities of power, but importantly, how inclusive forms of RE can help solve these problems.
