We revisit Lipset’s law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

Stravinsky's ballet score for The Firebird launched his career as a composer after its Paris premiere in 1910. Although he extracted an orchestral suite the following year, the large orchestra required limited performances in the concert hall. World War I, the Russian Revolution and a move to Switzerland intervened before he was able to arrange a suitable concert suite for a normal-sized orchestra, which was given its premiere by Ernest Ansermet and the newly founded Orchestre de la Suisse Romande in April of 1919. Offered here is the first definitive newly engraved publication of the concert-hall staple in the near-century since its first publication by Chester in 1920 - in a notoriously error-heavy edition. Thoroughly researched and edited by Clark McAlister and Clinton F. Nieweg, this new study score will be a most welcome addition to the libraries of conductors, music students and fans of the great Russian master's music everywhere.

Explores the development of the hand weapon, from the invention of the percussion cap in the 1830s and the development of smokeless nitrocellulose propellants in the 1870s, to the increasingly complex family of weapons of the present

Let's face it, if you want to get ahead in business you cannot avoid people management - but we're often promoted because we're good at what we do, not because we display great management skills. We owe it to the people we manage to read up on the subject and get skilled! Luckily Jo Owen has laid out 50 essential lessons we need to learn to become the best manager we can be. Jo has studied what makes a good manager everywhere from British soap powder companies, to inner city schools and Japanese banks. So whether becoming a manager has brought out the inner dictator in you or left you feeling painfully awkward, Management Rules will have you relaxed, confident and effective in no time.

Every person has a story, a personal narrative that informs their life, their decisions, and their way of thinking. But did you know that it also affects the wiring of your brain? Renowned psychiatrist and professor at Harvard Medical School John Sharp, M.D., offers an eight-step process to discovering your unconscious narrative and using your new insight to eradicate the "false truth" that has been at the core of your self-sabotage. His unique approach integrates four core domains of applied psychology—control mastery theory, attachment theory, narrative therapy, and positive psychology—with his own research and professional experience to construct an insightful and soul-searching path to insight. Throughout his step-by-step process, Dr.Sharp provides: · The “Sharp Focus” to distill and emphasize important concepts · Quizzes to help you analyze your internal and external tendencies · “First Impressions” case studies from his professional practice · Awareness, insight, change, and narrative tools to facilitate your transformation · “Gut Checks” to help you figure out if you are ready to move on to the next step in the process Dr. Sharp’s approach is simple and accessible, with the power to wield profound results. Through exercises, quizzes, thorough exploration of case studies, and clear guidance, you will be able to find your false truth, rewrite your story, and transform your life. Once you have flipped the switch of insight, nothing can hold back the light that shines from within.
