**Manually Load Latest Firmware On G-BOX Midnight MX2 - How**  
 The links you posted to download the proper software and recovery no longer work. I tried installing a Kodi APK from a thumb drive, but the box says there is no memory available which is clearly false. Every boot there is a setup wizard so not sure what's going on. Hopefully can find a way to flash new firmware and get this thing going again.

**G-Box Midnight MX2 Software Update To 1.2 And What Is New**  
 The G-Box Midnight MX2 gives you 4 USB ports - so no need for an external hub. It gives you both wireless and wired networking connections. It gives you an SD card slot for external storage or easy transfer from other devices. With the exception of Bluetooth capability, this unit has it all right out-of-the-box.

**G-Box Midnight MX2 Review**  
 Put your SD card into your MX2, press the reset button located in the back of your MX2's A/V port (see this for flashing firmware for more detailed instructions), sit back and watch your MX2 flash away! If you don't see the flashing screen (pictured below), you may have an issue with your SD card or the file structure on your SD card.

**How to Update MX2 Firmware**  
 Step 1. Get an SD memory card that is at least 1GB in size Unzip or extract the downloaded Latest MX2 Firmware ZIP file to a location on your PC. Once unzipped, you will see you have 3 files. Copy these to your SD memory card.
