Published for the first time in the U.S. - one of the two diaries on which the upcoming movie *The Motorcycle Diaries* is based - the moving and at times hilarious account of Che Guevara and Alberto Granado's eight-month tour of South America in 1952. In 1952 Alberto Granado, a young doctor, and his friend Ernesto Guevara, a 23-year-old medical student from a distinguished Buenos Aires family, decided to explore their continent. They set off from Cordoba in Argentina on a Norton 500cc motorbike traveled through Chile, Peru, Colombia, and Venezuela. The duo's adventures vary from the suspenseful (stowing away on a cargo ship, exploring Incan ruins) to the comedic (falling in love, drinking, fighting...) to the serious (volunteering as firemen and at a leper colony). They worked as day laborers along the way - as soccer coaches, medical assistants, and furniture movers. The poverty and exploitation of the native population started the process that was to turn Ernesto - the debonair, fun-loving student - into Che, the revolutionary who had a profound impact on the history of several nations. Originally published in Spanish in Cuba in 1978, the first English translation was published by Random House UK in 2003. The movie, based on Granado's and Che's diaries, directed by Walter Salles (*Central Station*, *Behind the Sun*), was produced by Robert Redford and others. Shown at the Sundance Film Festival, it generated great reviews and a frenzied auction for distribution rights, which was won by Focus Features. Granado, now 82, was a consultant to Salles during the production.

Most countries around the globe have one or two levels of regional or intermediate government, yet we have little systematic idea of how much authority they wield, or how this has changed over time. This book measures and explains the

formal authority of intermediate or regional government in 42 advanced democracies, including the 27 EU member states. It tracks regional authority on an annual basis from 1950 to 2006. The measure reveals wide variation both cross-sectionally and over time. The authors examine four influences – functional pressures, democratization, European integration, and identity – to explain regionalization over the past half-century. This unique and comprehensive volume will be a vital resource for students and scholars of comparative politics, public administration and public management, federalism, democratization, nationalism, and multilevel governance.

This Absurdist masterpiece by the author of *Rhinoceros* “is explosively, liberatingly funny...a loony parody with a climax which is an orgy of non-sequiturs” (The Observer). Written in 1950, Eugene Ionesco’s first play, *The Bald Soprano*, was a seminal work of Absurdist theatre. Today, it is celebrated around the world as a modern classic for its imagination and sui generis theatricality. A hilarious parody of English manners and a striking statement on the alienation of modern life, it was inspired by the strange dialogues Ionesco encountered in foreign language phrase books. Ionesco went on to become an internationally renowned master of modern drama, famous for the comic proportions and bizarre effects that allow his work to be simultaneously hilarious, tragic, and profound. As Ionesco has said, “Theater is not literature. . . . It is simply what cannot be expressed by any other means.”
