Backed by the resources of Independent Feature Project/West, co-authors Nicole Shay LaLoggia and Eden H. Wurmfeld have written the definitive low-budget production manual. Using examples from the Swingers and Kissing Jessica Stein, this comprehensive manual offers the independent filmmaker a single volume reference covering every aspect of making a film: script rights and rewrites, financing, breakdown, scheduling and budgeting, pre-production, production, postproduction, and distribution. A resource guide listing useful references and organizations, as well as a glossary, complete this guide. The companion CD-ROM features interviews with important figures in the independent film industry, including Billy Bob Thornton and Ang Lee. Forms that are illuminated in the text are also included on the CD for ease of use. The new edition is updated with thorough coverage of digital and HD-how to decide which to shoot on, what the financial impact is, and the effect on preproduction. There is also a new chapter on distribution and expanded material on postproduction.

How to make successful documentary films, a resource book for novice and experienced filmmakers Caudia Babirat and Lloyd Spencer Davis pool their considerable experience to provide this clearly written, practical how-to manual on running a successful business in documentary filmmaking. This comprehensive, no-nonsense guidebook gives step-by-step advice on how to become an independent filmmaker of the future. The Business of Documentary Filmmaking examines the role of the independent filmmaker, and explains how you get a foot in the door, form an independent production company, write budgets and business plans, access funding and market your business. This book is brimming with helpful advice and important industry contacts as well as essential information provided by industry professionals - from filmmakers and broadcasters to entertainment lawyers and accountants. The fascinating case studies of practising filmmakers inspire with their originality and energy.

Written for the beginner, Practical DV Filmmaking guides you thorough the process of making a film with low-cost digital equipment: from development through to production, post-production and distribution. While the technical tools you need are fully explained, the book concentrates on filmmaking principles throughout, illustrating how these tools can be used to achieve stylistic approaches for innovative filmmaking. The book assumes no background knowledge in either technology or filmmaking and is divided into four key areas: *DEVELOPMENT: turn your idea into a workable script, storyboard and schedule. *PRODUCTION: develop skills to shoot original short films and turn a zero-to-low budget to your advantage. *POST-PRODUCTION: learn basic editing techniques to enhance your original idea using iMovie, Premiere and other popular tools. *DISTRIBUTION: set up a website and use the internet to promote your film. Includes numerous links to useful websites. Plus, top tips for how to enter a film festival and a new chapter on developing a career. Projects enable you to master each step of the process taking you through different aspects of filmmaking today. Gradually you will find out where your strengths lie and how to make the most of them. The book also encourages stylistic development by intruding theoretical approaches to filmmaking. A glossary of terms plus an appendix of resources make this guide a one-stop essential handbook to DV filmmaking practice for beginners and student filmmakers.
