Environmental engineers devise solutions for wastewater management, water and air pollution control, recycling, waste disposal, and public health. [2] [3] They design municipal water supply and industrial wastewater treatment systems, [4] [5] and design plans to prevent waterborne diseases and improve sanitation in urban, rural and recreational ...

## Environmental engineering - Wikipedia

Though plentiful, the water resources of the state are threatened by chemical contaminants and other pollutants from a wide range of sources. The Division of Water provides various programs that track the quality of the waters, identify and investigate sources of pollution, control these sources and develop strategies to address water quality threats.
